SECTION 3. Hazards

Route(s) Of Entry: 1. Inhalation. 2. Mechanical irritation to skin and eyes.

Carcinogens: Not a NTP/IARC carcinogen.

Signs & Symptoms of Exposure: Dry throat, cough, dry itching skin.

Human: Excess bulk exposure may cause acute respiratory irritant or dry skin.

Metal Fume Fever: Excessive inhalation exposure within hours of ZnO formation may cause 'metal fume fever.' Symptoms are chills, metallic taste, severe headache. This hazard only exists at the manufacture and not in later handling or use. Symptoms often persist 24 hours. See Section 4, First Aid.

Other Human hazard reports: Some users request ZnO with addition of processing aid additives or coatings, most commonly <0.1% content propionic acid, caprylic acid, or mineral oil. Acid content may increase exposed skin irritation. An internet search noted alleged dermatitis or oxide pox with oxides, however, this preparer finds no cases in reputable medical literature data of such conditions caused by zinc oxide products covered by this MSDS. Less than commercial quality, or tech grade, zinc oxide may contain other impurities requiring exposure consideration and is not covered by this MSDS.

Environmental: ZnO is not water soluble. However if chemically in solution, the net Zn in certain situations is, Very Toxic to aquatic organisms, may cause long-term adverse effects to the aquatic environment. R phrases are listed in Section 16.

SECTION 4. FIRST AID PROCEDURES

First Aid: Remove person from exposure.

Inhalation: Move to fresh air. Consult physician if acute symptoms persist.

Skin Contact: Wash with soap and water. Restore oil with lotion if necessary.

Ingestion: Drink water. Consult physician if complaints persist.

Eye Contact: Flush with water. Consult physician if acute symptoms persist.

Protection of First Responders: Wear suitable respirator if bulk dusty conditions exceed permissible exposure levels listed in Section 8. Wear additional protection for personal comfort as conditions warrant.

SECTION 5. FIRE, EXPLOSION AND FIRE FIGHTING DATA

Flash Point: Product is a solid (powder form), non-combustible, and will not burn.

Extinguishing Media: Use extinguishing media based on surrounding materials. Avoid release of fire control water to environment.

Hazardous (de)composition Product(s): None

SECTION 6. ACCIDENTAL RELEASE MEASURES

If spilled, shovel or sweep spills into suitable labeled container. Vacuum small spills. Prevent release to sewer, storm water, or environment. Spills not mixed with other chemicals may be recyclable, contact U. S. Zinc for further information. If disposed, dispose as hazard waste marine pollutant.

SECTION 7. HANDLING AND STORAGE

Storage: Keep dry. Preferred storage in cool and dry place to minimize potency degradation. Keep closed in original containers until use to also minimize degradation. Once product is opened, potency degradation accelerates due to ZnO forming ZnCO₃ carbonate with CO₂ from ambient air. Potency degradation does not impact human and environmental health (potency degradation effects product technical assay quality only). Once opened, minimize dusting to reduce human and environment exposure.

Handling: Follow good practices to control and avoid exposure to nuisance dust. See Section 8.
